Introduction

Meridian Health Plan (MHP) is pleased to provide an updated 2013 Medicare Formulary as a reference and informational tool for physicians, pharmacists and patients. The MHP Formulary is designed to assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The MeridianRx Pharmacy and Therapeutics Committee (P&T)

The medications on this formulary have been reviewed by the MeridianRx P&T Committee. The Committee includes physicians, pharmacists and health professionals. The clinical information within the formulary is primarily derived from medical literature and is reviewed and approved by the P&T Committee.

Notice

The information contained in this formulary is provided by MHP, solely for the convenience of medical providers. This formulary is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in their choice of prescription drugs. Meridian Health Plan assumes no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

Preface

The MHP formulary is organized by sections. Each section includes therapeutic groups identified by either drug class or disease state. Products are listed by generic name. Brand and common names are included as a reference to assist in product recognition. MHP will not cover prescription drugs that are prescribed for experimental, investigational or non FDA approved indications, dosages, or routes of administration.

Product Selection Criteria

The MeridianRx P&T Committee considers clinical information on new to market drugs that are typically included in an outpatient pharmacy benefit. The primary goal of the MeridianRx P&T Committee is to preserve and evaluate the MHP formulary based upon an objective analysis of the safety, efficacy, approved indications, adverse effects, contraindications, patient administration/compliance considerations and cost effectiveness. When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently included in the MHP Formulary. Formulary decisions are communicated quarterly on the MHP website.

Formulary Components

The MHP Formulary contains the following components: Covered medications without authorization, medications that must meet Step Therapy Protocol, medications that require Prior Authorization, Specialty medications and medications that are subject to Quantity Limits. Members will not be charged a copay when MHP covers a medication.

Generic Substitution

MHP is a mandatory generic plan. The brand and common names listed in the formulary are for reference only. Generic medication will be dispensed where available.

Covered Medications without Authorization

MHP covers many medications without any authorization required. These medications include many prescription and over the counter medications. (When ordered by a physician.)

Non-Covered Benefits

The following categories are not covered benefits: Medications used for cosmetic purposes, to promote fertility, for sexual dysfunction, to treat gender identity conditions, for experimental or investigational purposes, or medications that are not licensed for use in the United States.

Prior Authorization

Drugs indicated with "PA" require Prior Authorization for coverage. Details of the PA criteria are listed next to the drug name. Please call the MeridianRx Help Desk at 1-866-984-6462 or fax a completed Prior Authorization form to 1-877-355-8070. Non-Urgent requests are reviewed within 14 days. Urgent requests must be accompanied by pertinent clinical information and are reviewed within 72 hours.

Step Therapy

Drugs indicated with a "ST" require Step Therapy for coverage. The required step is listed next to the drug name.

Specialty Medications

All specialty medications noted as "SP" are handled by MeridianRx. To order a specialty medication by fax, send the prescription and a completed prior authorization form to 1-877-355-8070 or call MeridianRx's Help Desk at 1-866-984-6462.

Quantity Limits

Drugs indicated with a "QL" have a set quantity limit imposed. These limits are based on FDA recommended dosing guidelines. The quantity limit is listed next to the drug name. All medications are subject to a maximum of 30 days per prescription.

Benefit Exception

The process for requesting non formulary medication(s) requires faxing of a completed Prior Authorization form indicating the request for an exception to the formulary. This request will need to include pertinent clinical documentation showing trial and failure of all formulary agents. It should also contain information showing the medication is the standard of care for the indication provided (Peer reviewed journal articles may be required). Please call the MeridianRx Help Desk at 1-866-984-6462 or fax a completed Prior Authorization form to 1-877-355-8070.

MHP utilizes MeridianRx to manage each member's pharmacy benefit. MeridianRx provides MHP with a pharmacy network, pharmacy claims management services, and claims adjudication. MeridianRx's Help Desk can be contacted at 1-866-984-6462.
