Introduction

MeridianRx is pleased to introduce the 2013 Caidan Management Company (CMC) Commercial Formulary as a reference and informational tool for physicians, pharmacists and members. The CMC Formulary is designed to assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

Notice

The information contained in this formulary is provided by MeridianRx, solely for the convenience of medical providers. This formulary is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in their choice of prescription drugs. MeridianRx assumes no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

Preface

The CMC Formulary is organized by sections. Each section includes therapeutic groups identified by either drug class or disease state. Products are listed by generic name. Brand and common names are included as a reference to assist in product recognition. CMC will not cover prescription drugs that are prescribed for experimental, investigational or non-FDA approved indications, dosages, or routes of administration.

Product Selection Criteria

The medications on this formulary have been reviewed by the MeridianRx Pharmacy & Therapeutics (P&T) Committee. The Committee includes physicians, pharmacists and health professionals. The clinical information within the formulary is primarily derived from medical literature and is reviewed and approved by the P&T Committee.

The MeridianRx P&T Committee considers clinical information on new to market drugs that are typically included in an outpatient pharmacy benefit. The primary goal of the MeridianRx P&T Committee is to preserve and evaluate the CMC Formulary based upon an objective analysis of the safety, efficacy, approved indications, adverse effects, contraindications, patient administration/compliance considerations and cost effectiveness. When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently included on the CMC Formulary. Formulary decisions are communicated quarterly on the CMC Employee intranet site.

Formulary Components

The CMC Formulary contains the following components: Covered medications without authorization, Medications that must meet Step Therapy Protocol, Medications that require Prior Authorization, Medications with Quantity Limits.

Also included are Specialty medications that must be filled at a MeridianRx partnered Specialty Pharmacy.

Generic Substitution

The CMC Formulary is a generic based plan. The brand and common/generic names listed in the formulary are for reference only. Generic medication will be dispensed where available. If a prescriber writes a prescription that is marked "Dispense As Written or D.A.W" and an equivalent A/B rated generic product is available, the prescriber will need to fill out a prior authorization request form, detailing the trial and failure or intolerance to the generic medication. The Prior Authorization form will need to be submitted to the MeridianRx Clinical Team via 855-291-5227 for review. A decision will be faxed to the prescriber within 72 hours.

Covered Medications without Authorization

CMC covers many medications without any prior authorization required. These medications include many prescription and over the counter medications (when ordered by a physician).

Non-Covered Benefits

The following categories are not covered benefits: Medications used for experimental or investigational purposes, Medications that are not licensed for use in the United States.

Prior Authorization

Drugs indicated with "PA" require Prior Authorization for coverage. Details of the PA criteria are listed next to the drug name. The prescriber should call the MeridianRx Clinical Team (phone number) or fax a completed Prior Authorization form to 855-291-5227. A decision will be faxed back to the prescriber within 72 hours.

Step Therapy

Drugs indicated with a "ST" require Step Therapy for coverage. The required step is listed next to the drug name.

Specialty Medications

All specialty medications noted as "SP" are handled by MeridianRx. If a specialty medication is needed, MeridianRx will assist you with the processing of your prescription by a Specialty Pharmacy. The medication will be shipped to the employee's home address. To order a specialty medication by fax, send the prescription and a completed Prior Authorization form to 855-291-5227.

Quantity Limits

Drugs indicated with a "QL" have a set quantity limit imposed. These limits are based on FDA recommended dosing guidelines. The quantity limit is listed next to the drug name. All medications are subject to a maximum of 30 days per prescription at a retail location. Maintenance medications may be filled for a 90-day supply through our mail order partner NoviXus. To place a mail order, call NoviXus at 877-668-4987 or register online at www.novixus.com.

Benefit Exception

The process for requesting non-formulary medication requires the prescriber to fax a completed Formulary Exception form indicating the request for an exception to the formulary. This request needs to include pertinent clinical documentation showing trial and failure of all formulary agents. It should also contain information showing that the medication is the standard of care for the indication provided (peer reviewed journal articles may be required). Exception requests are handled on an individual basis. If an exception request is approved, the copay will be paid at a Tier 1 for generic, Tier 3 for brand and Tier 4 for specialty (see next section). To request a formulary exception, the prescriber must call the MeridianRx Clinical Team at 855-291-5226 or fax a completed Benefit Exception form to 855-291-5227.

Copay Structure

The CMC Formulary is structured into Tiers. Each Tier is associated with a copay amount. These amounts are as follows:

Tier 1: This tier contains generic medications. The copay is \$20. If the medication costs less than \$20 the lower amount will be charged.

Tier 2: This tier contains preferred branded medications. The copay is \$60. If the medication costs less than \$60 the lower amount will be charged.

Tier 3: This tier contains non-preferred branded medications. The copay is \$80. If the medication costs less than \$80 the lower amount will be charged. All requested DAW medications that are approved by the MeridianRx Clinical Team will be a Tier 3.

Tier 4: This tier contains specialty medications. The copay is 20% of the ingredient cost.

Appeal

A prior authorization may be denied if the request does not meet the clinical criteria. If your doctor's PA request is not approved, you and your doctor will get a letter explaining why. The letter will also explain the appeal process if you and your doctor disagree with the denial.

Contraceptives

The ACA and associated regulations allow MeridianRx to apply practical measures to allow for optimal cost and encourage good health outcomes.

MeridianRx has modified the prescription drug formulary to enable better management of drug costs associated with this change. MeridianRx will cover most contraceptives at no cost to the member. However, MeridianRx will not cover all FDA-approved contraceptives at no cost-share, for example, contraceptives that have a generic equivalent may not be covered. As information on the new regulation is released, updates will be made to the formulary and communicated via the employee intranet site.

Questions

For general questions about your medical or pharmacy benefit please call: 855-291-5226 or email cmcpharmacyteam@meridianrx.com.

For specific questions about pharmacy claims please 855-291-5226.
